

Course Outline

Certified ISO 27001 Foundation

Duration: 2 days

Learning Objectives:

This course enables the participants to learn about the best practices for implementing and managing an Information Security Management System (ISMS) as specified in ISO/IEC 27001:2013, as well as the best practices for implementing the information security controls of the eleven domains of the ISO 27002. This training also helps to understand how ISO 27001 and ISO 27002 are linked with ISO 27003 (Guidelines for the implementation of an ISMS), ISO 27004 (Measurement of information security) and ISO 27005 (Risk Management in Information Security).

- To understand the implementation of an Information Security Management System in accordance with ISO27001
- To understand the relationship between an ISMS, including risk management, controls and compliance
- To know the concepts, approaches, standards, methods and techniques allowing to effectively manage an ISMS

Target Audience:

- Members of an information security team
- Staff involved in the implementation of the ISO 27001 standard
- Technicians involved in operations related to an ISMS
- Auditors

Prerequisites

None

EXAM:
